Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, 30, 32, 49-51, drawn to composition I, classified in class 435, subclass 183+.
- II. Claims 19-29, 31 and 33, drawn to composition II, classified in class 435, subclass various.
- III. Claim 34, drawn to a method of using composition I, classified in class 424, subclass various.
- IV. Claim 35, drawn to a method of using composition II, classified in class 514, subclass various.
- V. Claims 36-44, drawn to a method of making comp. I, classified in class 436, subclass various.
- VI. Claims 45-47, drawn to a method of making comp. II, classified in class 514, subclass various.
- VII. Claim 48 and 52-55, drawn to comp. III, classified in class 530, subclass various.
- VIII. Claim 56, drawn to comp. IV, classified in class 426, subclass various.

- IX. Claim 57, drawn to a method of using comp. IV, classified in class 435, subclass various.
- X. Claims 58-60, 62-64, drawn to comp. V, classified in class 424, subclass various.
- XI. Claim 61, drawn to a first method of using comp. V, classified in class 514, subclass various.
- XII. Claim 65, drawn to a second method of using comp. V, classified in class 530, subclass various.

The inventions are distinct, each from the other because of the following reasons:

The compositions are materially distinct from one another since they involve completely different ingredients (components) from one another. These react differently from one another, i.e. an enzyme versus a saccharide.

The methods of using these different compositions are also materially distinct from one another. As is evidenced by the different methods themselves, these compositions can be used in many materially distinct processes of use.

The methods of making the different compositions are also materially distinct from one another. As is evidenced by the different methods themselves, these compositions can be made by many materially distinct processes.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: the many different species of components in the compositions.

Applicant is required to enumerate the specific components in the compositions to be used or made. For example, list the type of specific ester to be used, the specific source of the lipase, etc.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 19, 36, 45, 48 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
